Transmitter Low Battery Alarm

Complete Kit	12.50	'Build It' Service	3.50
PIC Only	N/A	Case	N/A
PCB Only	2.50		
PIC + PCB	N/A		

Numerical Display Glitch Counter

Complete Kit	12.50	'Build It' Service	3.50
PIC Only	5.00	Case	1.00
PCB Only	2.50		
PIC + PCB	7.00		

Data Logging Receiver Supply Voltage Monitor

Complete Kit	12.50	'Build It' Service	3.50
PIC Only	5.00	Case	1.00
PCB Only	2.50		
PIC + PCB	7.00		

Simple uP Controlled Motor Speed Control (10A)

Complete Kit	12.50	'Build It' Service	3.50
PIC Only	5.00	Case	1.00
PCB Only	2.50	4 x 250mm wire	2.00
PIC + PCB	7.00		

Simple uP Controlled Motor Speed Control (20A)

Complete Kit	16.50	'Build It' Service	3.50
PIC Only	5.00	Case	1.00
PCB Only	2.50	4 x 250mm wire	2.00
PIC + PCB	7.00		

Versatile Microprocessor Based Servo Tester

Complete Kit	14.00	'Build It' Service	4.00
PIC Only	5.00	Enclosure Kit	2.00
PCB Only	3.00		
PIC + PCB	7.50

General Information

This Price List provides detailed pricing information for each of the available projects and products. Each project may be purchased as a complete kit of parts including the PCB or, in most cases, some of the components are available separately; most notably the micro-controller and/or PCB. Additionally, for some projects, there are ancillary items which may be purchased by those people without easy access to suppliers of electronic components.

The list of components for each project may be found in the Project Article which also specifies any ancillary parts that may be required and complete kits include all the electronic components, the PCB and, where appropriate, the preprogrammed microcontroller. Not included in the kit is the recommended case or any ancillary items listed. These may be purchased separately where indicated.

In addition to the supply of kits and components there is a '**Build It**' service available for those people who would like to purchase a kit but who would prefer not to assemble it themselves.

As detailed in the **Ordering Information** section below all prices are listed in UKP and are exclusive of Postage and Packing.

Build It Service

This service is available to people purchasing a complete project kit and includes the assembly and test of the PCB. If appropriate for the kit being purchased the buyer may supply with the order a suitable servo lead, cut to the desired length, which will be soldered to the PCB rendering the unit ready for immediate use when delivered.

Should the recommended case also be ordered the service does not include case rework but please note that a case rework drawing is included in the full Project Article.

Ordering Information

All prices are given in UK Pounds Sterling (UKP) and exclude postage and packing. For deliveries to the UK mainland please add 1.00 UKP and for orders outside the UK mainland please see the **International Orders** section at the bottom of this page.

All kits are kept in stock and dispatch is normally within 2 days of receiving the order but in the unlikely event of an abnormal delay we will inform you.

Payment may be made by either a cheque, in UKP, drawn on a UK bank or by UK postal order.

Please send your order to the following address:-

Mr. M. Barratt
68 Kentsford Road
Kents Bank
Grange-over-Sands
Cumbria
LA11 7BB
United Kingdom

Please make cheques/postal orders payable to M. Barratt.

International Orders

Payment Methods

Payment for overseas orders may be made by International Money Order or Cheque in UK Pounds Sterling (UKP) drawn on any bank with a branch in London, England.

For European orders a Eurocheque made in UKP is also an option.

Cash in UK Pounds is also acceptable but there is obviously a greater risk associated with the mailing of cash.

International Air-Mail Postage

This varies from country to country but in order to make ordering as easy as possible the 'universal' figure of 2.00 UKP should be added to each order for a single item. For orders containing more than one item please e-mail us for a specific quotation.

Customs

Many, if not all, countries levy import duty on any imported items. In most cases customs officers do not intercept packages of this type and there are no problems. However, it is possible that import duty, and possibly a handling charge, will be levied. As this is beyond our control we can accept no responsibility and thus the entire risk, albeit a small one, is borne by the recipient.
